

**B****THE  
BIOREGIONAL  
LEARNING  
CENTRE**

**Water is one of the first resources to become stressed by climate change.**

What do we need to know in order to save water-for the River Dart and in our homes and workplaces?

## VOICES OF THE DART WORKSHOPS

**Join us in one of four workshops: a mix of facts about water and 'designing for action'.**

Data about our freshwater supplies and scientific modelling of climate change will be shared, alongside some creative fun!

This is an opportunity to pool local knowledge and local concerns while testing ground-breaking ways for future water planning that will be shared across the UK.

**Saturdays, 2-5pm**

**Dartmouth, The Flavel - 26th February**

**Totnes, Civic Hall - 12th March**

**Buckfastleigh Town Hall - 26th March**

**Ashburton, St. Andrew's Church Hall - 2nd April**

'Voices of the Dart', is a project led by the Bioregional Learning Centre based in Totnes. Partners include South West Water, the Global Systems Institute at Exeter University and Westcountry Rivers Trust, with artist lone Maria Rojas.
